East Garrison Project Mitigation Grant Fund Monterey, CA – April 2, 2018

The Monterey Bay Air Resources District recently granted \$83,000 to the Scott Anthony & Oshita Ranch, L.P. in Monterey County to fund the replacement of an old 2003 model year diesel powered agricultural irrigation pump with a new electric booster pump. The old diesel pump has been operating for 15 years, emitting approximately 1.71 tons of air pollutants per year. By replacing the old agricultural pump with an electric booster pump, this grant will potentially save 34 tons of air pollutants over a 20 year engine lifespan. This project will help improve future air quality in our region for years to come. For more information about grant opportunities through the Monterey Bay Air Resources District, please contact the Planning Division at (831) 647-9411.
