

## ***Monterey Bay Electric Vehicle Incentive Program (EVIP) Monterey, California – August 1, 2019***

On March 20, 2019 the Monterey Bay Air Resources District Board authorized this year's AB2766 Motor Vehicle Emission Reduction Grant Program. This year's program includes the FY20 Monterey Bay EVIP which consists of incentives to the general public for the purchase of fully electric (BEV) and plug-in hybrid electric vehicles (PHEV).

According to Richard Stedman, Air Pollution Control Officer for the Monterey Bay Air Resources District, "Oxides of nitrogen (NO<sub>x</sub>) are primary chemical compounds combined with other pollutants that produce ozone (smog). Over 60% of the total emission of NO<sub>x</sub> in the Air District comes from motor vehicles. Fully electric vehicles produce zero emissions and zero green-house gases. By encouraging and incentivizing their use, significant long term air quality benefits can be achieved."

The Monterey Bay EVIP consists of the following incentive amounts:

### **New Vehicles**

- \$1500 for Hydrogen Fuel Cell Vehicles
- \$1000 for Battery Electric Vehicles
- \$500 for Plug-In Hybrid Electric Vehicles
- \$200 for Electric Motorcycles

### **Used Vehicles (must be Dealer Pre-Certified for battery condition)**

- \$750 for Battery Electric Vehicles
- \$300 for Plug-In Hybrid Electric Vehicles

### **Further funding may be available for low income households. Income verification is performed by a contracted 3rd party.**

- Additional \$1000 for new Battery Electric Vehicles
- Additional \$500 for new Plug-In Hybrid Electric Vehicles
- Additional \$750 for used Battery Electric Vehicles
- Additional \$300 for used Plug-In Hybrid Electric Vehicles

Applications will be available online at: <http://mbard.org/>
