## AIR POLLUTION CONTROL OFFICER'S BUDGET MEMORANDUM

Date: May 15, 2019

Dear Chair McShane, Board members,

I respectfully submit to you the Fiscal Year 2019-20 (FY 19/20) proposed budget for the Monterey Bay Air Resources District (MBARD). This budget was prepared according to the state and federal legal requirements as well as policy framework and direction provided by the Board of Directors and the Budget Personnel and Nominating Committee. In addition, District staff conducted three public budget and fee workshops, one in each county of our tri-county jurisdictions during the month of April 2019. The following represents the highlight for revenue and expenditures in MBARD's FY 19/20 budget.

MBARD's FY 19/20 budget represents a total of \$19.2 million, consisting of \$6.3 million in operational costs and \$12.9 million in non-operational (Grant Programs) costs. Operational costs are approximately the same as the previous fiscal year. Due mainly to new grant programs offered by the California Air Resources Board, the non-operational budget has increased by more than \$3 million over the previous year. Staffing level (32 full time employees) remains unchanged from the prior fiscal year.

For FY 19/20, the District proposes a fee increase of 4.5 percent. Fees for gasoline dispensing facilities will not be increased. A fee increase of 10 percent is proposed for asbestos-related permits. Even with the proposed fee increases, the District's cost recovery for the Stationary Permit Program is at 85%.

In addition to the proposed fee increase, consistent with board direction over the past few years, the FY 19/20 budget includes an increase in City and County per capita fees from \$.43 to \$.47. This will result in an additional \$33,600 in revenue.

This next fiscal year, MBARD plans to spend \$562,000 on fixed asset purchases, including the following:

- ❖ \$225,000 for a new permitting and compliance database,
- ❖ \$210,000 for District office building and air monitoring station improvements,
- ❖ \$67,000 for vehicle replacements,
- ❖ \$30,000 for a document management system,
- ❖ \$30,000 for volatile organic compounds (VOC) monitoring equipment.

This next fiscal year, MBARD will contribute and estimated \$100,000 to the District's Other Post Employment Benefit (OPEB) Trust, funded by the General Fund reserve designated for post-employment benefits.

For MBARD's Grant Programs, the following expenditures are planned for FY 19/20:

- ❖ \$9.3 million for grant payments to reduce emissions for the District's ongoing AB2766, AB923, and Carl Moyer programs and grants under the new Community Air Protection (CAPP) and Funding Agricultural Replacement Measures (FARMER) programs.
- ❖ \$2.65 million to continue District's Plug-In Monterey Bay program to install electric vehicle stations throughout Monterey, Santa Cruz, and San Benito counties. In addition, the District will continue its electric vehicle incentive program for District's residents.
- ❖ Continued assistance towards reducing PM2.5 emissions in the San Lorenzo Valley, including \$175,000 for Woodstove Change -Out grants.

MBARD's commitment to protecting our air while balancing economic considerations is presented in this proposed budget. We focus on core programs and maintain strong internal controls to avoid financial risks. We seek the most cost-effective solutions on behalf of local residents and businesses. We strive every day to work with the community, industry, and regional partners to find reasonable and cost effective solutions to protect air quality throughout the North Coast Central Air Basin.

Respectfully,

Richard A. Stedman  
Air Pollution Control Officer

## ADMINISTRATIVE DIVISION

---

The Administrative Division consists of the Air Pollution Control Officer (APCO), an Administrative Services Manager, an Executive Assistant, an Administrative and Fiscal Specialist, an Senior Fiscal Assistant, and an Office Assistant. The Division performs the following functions:

### **General Operations**

The Division is responsible for all premises management including building and grounds, vehicle fleet management, District Safety Program, administrative support, telephone systems, reception duties, mail room, copy functions and office supplies.

General Operations also includes human resource management and benefit administration for the District's 32 budgeted positions. No new positions are proposed for FY 19-20 with one vacant position in Air Monitoring. In FY 18-19, three recruitments were completed to fill positions that were vacated due to employee retirements.

### **Finance and Accounting**

The accounting section is responsible for all general accounting functions including accounts receivable, accounts payable, payroll, fixed asset management, grants, risk management, and related financial reporting.

An important function of this section is the preparation and tracking of the annual budget. All managers participate in a collaborative effort with the APCO and the Administrative Services Manager in compiling and presenting the annual proposal. Additional responsibilities include preparation of annual audit schedules and risk management.

In FY 19-20, the Administrative Division will work closely with the Engineering and Compliance Divisions in implementing a new permitting database program. The Division will also be part of a District-wide team to implement a new document management system that is planned for the new fiscal year.

The District's financial audit for FY 17-18 was successfully completed in January 2019 with the District receiving a "clean" audit with no significant deficiencies or material weaknesses identified.

### **District Boards**

The Division provides support to the District's Board of Directors, Hearing Board and Advisory Committee. In that function all agendas, notices, minutes and public inquiries are handled. In FY 18-19, the Board of Directors adopted updated policies and procedures that provide guidance regarding legal and consistent operations of the District's boards and committees.

Monterey County Counsel provides contracted legal advice to the Board of Directors and its committees, the Advisory Committee, APCO and staff as well as representing the District in civil litigation, variance cases, abatement actions and permit revocations before the Hearing Board.

## AIR MONITORING DIVISION

---

The Air Monitoring Division consists of one Supervising Air Monitoring Specialist, two Senior Air Monitoring Specialists, and one Air Monitoring Technical Assistant. In FY 2019-20 the District expects to continue to look for ways to lower expenditures including staff costs through attrition and reorganization. The Division performs the following functions:

### **Ambient Air Monitoring**

The District operates a monitoring network to determine compliance with California and federal ambient air quality standards within a three county jurisdiction known as the North Central Coast Air Basin (NCCAB). The District also operates special purpose monitoring networks related to smoke management of outdoor burning and fine particle emissions from home heating with wood. These networks deliver near real-time measurements that are presented online in order to provide the public with characterizations of air quality based on the EPA's Air Quality Index (AQI). They also support the District's online pollutant forecasting and wood smoke curtailment programs.

### **Ozone**

Ozone is monitored at six air monitoring stations within the District. One of these monitors is operated by the National Parks Service. The District is in attainment with the federal eight-hour ozone ambient air quality standard (AAQS) at all of these stations. The District is currently not attaining the California eight-hour ozone AAQS due to pollution levels monitored at Pinnacles National Park.

The Division provides technical assistance and collaborates with the National Park Service at the Pinnacles National Park monitoring station. Even though this is not a District operated station, ozone measurements from this site can be used to determine the District's attainment status. These measurements are most reflective of emission reduction benefits from the ozone precursor source region; the San Francisco Bay Area.

### **Particulate Matter**

"PM<sub>10</sub>", or PM Coarse, refers to particles that are 10 micrometers or less in aerodynamic diameter (about  $\frac{1}{25}$  the diameter of a human hair). The Division conducts PM<sub>10</sub> monitoring using continuous measurement devices at the Hollister and King City stations. These sites show periodic exceedances of the California standard caused by fugitive dust emissions on windy days. A violation of the state standard occurs when PM<sub>10</sub> exceeds a 24 hour average of 50  $\mu\text{g}/\text{m}^3$ . An exceedance does not necessarily indicate a violation of the standard if the exceedance is caused by an exceptional event such as smoke from a wildfire.

The North Central Coast Air Basin is in attainment of the federal AAQS for PM<sub>10</sub>, however, it continues to be in non-attainment with the California AAQS. This status is a result of exceedances at the King City station in Monterey County due to dust from plowed agricultural fields in the Salinas Valley. The only other PM<sub>10</sub> monitor, located in Hollister, is in attainment for both the federal and state AAQS.

**PM<sub>2.5</sub> or “PM Fine”**

The Division monitors PM<sub>2.5</sub> at stations located in Salinas, Santa Cruz, Hollister, Carmel Valley, King City, and Felton. The North Central Coast Air Basin is currently in attainment of the PM<sub>2.5</sub> federal and California AAQS. “PM<sub>2.5</sub>” refers to particles that are 2.5 micrometers or less in aerodynamic diameter (about 1/70<sup>th</sup> the diameter of a human hair).

PM<sub>2.5</sub> is also monitored in support of the District’s Smoke Management Program. Temporary networks are established to detect fine particle emissions from burns conducted at the former Fort Ord, other large prescribed burns, wildfires, and in the San Lorenzo Valley for wood smoke from wood stoves and fireplaces.

**Other Criteria Pollutants**

Pollutants such as nitrogen dioxide, nitric oxide, oxides of nitrogen, and carbon monoxide are monitored at the Salinas station. The District is in attainment of both federal and state AAQS for these pollutants.

**FY 2018 - 19 Major Accomplishments**

- ✓ Met all EPA and ARB data collection, reporting and quality assurance requirements at all stations.
- ✓ Received additional 105 Grant funds which offset materials costs of monitoring activities in the San Lorenzo Valley.
- ✓ The District continues the operation and maintenance of the PM<sub>10</sub> network located within the Hollister Hills Recreational Vehicle Park. The District receives direct compensation for this work.
- ✓ Refined operations and modernized air monitoring resources.
- ✓ Completed Beach Monitoring Study for Carmel-by-the-Sea.
- ✓ Continued to support wood smoke reduction efforts in the San Lorenzo Valley by monitoring

**FY 2019 - 20 Objectives**

- Continue to meet all ARB and EPA monitoring requirements.
- Continue modernization activities and apply benefits to expand more efficient operations to meet District needs.
- Continue to optimize and tailor new data acquisition system capabilities to increase automation and remote control capabilities for air monitoring tasks.
- Continue monitoring in the San Lorenzo Valley to support District endeavors to reduce PM fine levels from wood smoke and backyard burning. This includes the continued use of an Aethelometer at the SLV Middle School Station in Felton to quantify the wood smoke component of PM<sub>2.5</sub> in this area.

### **Meteorological Monitoring**

The Division monitors and reports hourly meteorological data at sites in Salinas, Hollister, Santa Cruz, King City, Carmel Valley, and Felton. Parameters recorded are wind speed, wind direction, and ambient temperature. Meteorological measurements are critical to understanding air quality. These measurements directly affect and support District air quality forecasting and smoke management programs. Meteorological data is also used to understand pollutant flux in the air basin and when responding to citizen complaints.

### **Source Specific Monitoring**

The Division supports remote smoke monitoring instruments to detect smoke emissions from controlled burns, wildfires, and prolonged large structure fires. The Division may also assist in complaint response through the use of portable air monitoring equipment

#### **FY 2018 - 19 Major Accomplishments**

- ✓ Met all data collection, reporting, and quality assurance objectives.
- ✓ Applied meteorological measurements at special study and temporary monitoring sites.
- ✓ Continued the use of radiosondes for atmospheric vertical profiling to support smoke management projects.

#### **FY 2019 - 20 Objectives**

- Continue meteorological monitoring to meet District needs.
- Continue to upgrade meteorological monitoring systems as needed.
- Establish a sensor network at various locations throughout the District.

## COMPLIANCE DIVISION

---

The Compliance Division staff consists of an Engineering and Compliance Manager (0.5 FTE), a Supervising Inspector, seven field Air Quality Compliance Inspectors, one Senior Administrative Assistant, and one Engineering & Compliance Specialist (0.75 FTE).

The Division performs the following functions:

### **Inspections of Stationary Sources**

Compliance inspectors conduct unannounced inspections of over 3,000 permits to assure compliance with all of the permit requirements, applicable District regulations, and state and federal laws.

Air quality violations trigger investigations and enforcement actions. To ensure compliance with District permit and/or other regulatory requirements, the Division uses a suite of corrective actions including direct remediation, education, supplemental environmental projects and monetary penalties.

Under the District's inspection policy, inspections are assigned based on various factors, including a source's compliance and complaint history, potential for air quality impact, frequency of equipment use, and the presence of toxic air contaminants.

During calendar year 2018, the Division performed 1,564 inspections of permitted equipment, responded to 278 public complaints, and addressed 16 reported facility equipment breakdowns.

#### **FY 18-19 Major Accomplishments**

- ✓ Implemented the California Air Resources Board (CARB) Landfill Gas Control measure.
- ✓ Entered into a Memorandum of Understanding with CARB to implement and enforce the requirements of their Oil and Gas Regulation.
- ✓ Implemented and enforced the CARB Oil and Gas Regulation.
- ✓ Completed all major source inspections and majority of minor source inspections.
- ✓ Met all EPA requirements for inspection, reporting, and enforcement of sources covered by federal agreements.
- ✓ Streamlined inspection process and populated District's paperless workflow system.
- ✓ Expanded use of administrative assistances to perform office-based duties to allow field-based inspection staff to remain in the field conducting inspections.
- ✓ Searched for businesses operating without required permits under the Unpermitted Source Identification Program.
- ✓ Cross-trained in the Mutual Settlement, Asbestos, and Vapor Recovery programs.

FY 19-20 Objectives

- Develop and update policies and procedures to improve consistency of enforcement actions.
- Continue to look for opportunities to reduce unnecessary redundancies with inspection paperwork and to continue to expand the use of administrative assistances.
- Increase availability of District information for stakeholders and the general public.
- Continue Unpermitted Source Identification Program.
- Continue cross-training of Division Staff.

**Observation of Source Tests**

District inspectors oversee approximately 200 source tests conducted at stationary sources. Staff reviews the source test protocol prior to the test, reviews the protocol to ensure the proper test is conducted and that the source test contractor has the proper equipment and certification to conduct the test, witnesses the test to ensure the source test contractor follows the correct test procedures, and reviews the source test results to ensure the data is properly reported and to act promptly on any compliance issues related to the testing.

**Complaint Investigations**

The Division receives several hundred complaints each year. Timely responses and investigations of alleged sources of non-compliance are top priorities.

FY 18-19 Major Accomplishments

- ✓ Refined complaint response process to allow more efficient use of staff time while continuing to provide the same level of service to the public.
- ✓ Provided timely responses to complaints and investigations of alleged sources of non-compliance.

FY 19-20 Objectives

- Evaluate complaint response procedures and apply findings towards improving District efforts.

**Retail Gasoline Dispensing Facilities**

Retail gasoline dispensing facilities are one of the largest potential sources of volatile organic compounds (VOC) emissions in the District. A comprehensive inspection and testing program is in place to ensure vapor recovery systems operate as certified, resulting in actual emission reductions. Vapor recovery at gasoline dispensing facilities also protects public health by reducing exposure to benzene.

In Station Diagnostics (ISD) enhanced the inspection process by monitoring the performance of the vapor recovery system and detecting equipment problems when failures occur. ISD is an important tool for inspectors, owners/operators and third-party contractors.

Compliance Division staff inspects gasoline dispensing facility vapor recovery systems annually, ensuring that required records are maintained, ISD is operated as certified, and that torn hoses, damaged nozzles, loose tank caps or other equipment defects are remedied as soon as possible.

Annual vapor recovery system performance test results are reviewed as part of the final compliance determination. Compliance Division staff also conduct unannounced observations of these tests, which are conducted by third party contractors, to ensure contractor adherence with California Air Resources Board (CARB) test procedures.

FY 18-19 Major Accomplishments:

- ✓ Completed compliance inspections of all 256 retail gasoline dispensing facilities.
- ✓ Observed 11% of vapor recovery tests conducted at retail gasoline dispensing facilities.
- ✓ Received CARB training on Phase I and II Enhanced Vapor Recover (EVR) systems and vapor recovery testing.
- ✓ Sponsored and participated in ISD training provided by the ISD manufacturers.
- ✓ Completed a Retail Gasoline Dispensing Field Guide for inspectors.
- ✓ Utilized ISD data to educate owners/operators and determine compliance between inspections.
- ✓ Tracked and reviewed 229 vapor recovery tests (89%).

FY 19-20 Objectives

- Complete compliance inspections of 256 retail gasoline dispensing facilities.
- Observe 25% of vapor recovery tests conducted at retail gasoline dispensing facilities.
- Track and review 95% of vapor recovery tests.
- Sponsor and participate in ISD training provided by the ISD manufacturers.
- Continue to provide compliance assistance to owners/operators during inspections.
- Continue to utilize ISD data to educate owner/operators and determine compliance between inspections.

**Smoke Management Program**

The Division actively contributes to the District's smoke management activities. The Division handles complaints and enforcement actions on fireplace smoke, backyard burns, and prescribed burns and agricultural burns.

FY 18-19 Major Accomplishments

- ✓ Provided outreach on Rule 438 (Open Outdoor Fires) throughout District.
- ✓ Mailed 41 fireplace smoke complaint letters and educational materials to residents of smokey chimneys.

FY 19-20 Objectives

- Provide input to revisions to Rule 438 – Open Outdoor Fires.
- Enforce District rules governing excessive smoke and related nuisances.
- Continue to develop ways to effectively handle fireplace smoke complaints.

**Compliance Assistance**

The Division devotes considerable resources to assist the public and regulated sources with their understanding of regulatory requirements. The primary focus of these activities is to notify, educate and offer solutions to avoid potential compliance problems and achieve the best possible air quality.

FY 19-20 Objectives

- Evaluate compliance assistance methods and apply findings towards improvement of District customer support efforts.

**Hearing Board**

The Hearing Board is comprised of five citizens appointed by the District’s Board of Directors. The District’s Compliance Division staff represents the District at variance hearings. Staff prepares draft orders, staff reports, and provides testimony for all variance applications received. Staff also tracks variances to ensure sources comply with variances and other Hearing Board orders. During calendar year 2018, two variances to District operating permits were issued by the Hearing Board.

FY 18-19 Major Accomplishments

- ✓ Worked with Hearing Board and UCSC to maintain campus utility grid with a natural gas emergency generator while installing and testing a new medium voltage instrumentation and programming to their recently installed Combined Heat and Power cogeneration plant.
- ✓ Worked with the Hearing Board and a local landfill to improve capture and control of landfill gas used for power generation to reduce emissions.

FY 19-20 Objectives

- Utilize new District Permit database to provide technical support to Hearing Board members.
- Improve tracking and recording of elements of progress for duration of granted variances.

## **Asbestos Program**

The Division has the delegated authority to enforce the federal EPA Asbestos NESHAP program (National Emission Standards of Hazardous Air Pollutants) The mission of the program is to prevent and protect public health from unnecessary asbestos fibers releases and exposures that may stem from renovation, demolition and asbestos abatement projects. This is conducted by compliance assistance, routine inspections, investigations, and complaint response.

Projects range from renovation asbestos removal to multi-structure demolition projects. Typically, projects that would be regulated by the program are schools, commercial, industry, and residential facilities. Stand-alone single family dwellings are typically not regulated by the program.

The program partners with other governmental agencies such as building departments, county health departments, Cal/OSHA, Contractor State Licensing Board, and other Air Districts to help ensure compliance to protect public health.

When non-compliance has been determined, the program works to get the non-compliance corrected as soon as possible. Severe enforcement cases of non-compliance are referred to District Attorney offices for appropriate prosecution.

### **FY 18-19 Major Accomplishments**

- ✓ District received and reviewed 276 project notifications and conducted 189 inspections.
- ✓ Ensured compliance at several large scale projects including multi-structure demolition at the Former Fort Ord, New Salinas Police Station site, future home development in Hollister, and fire debris cleanup in Seaside, Salinas, and Greenfield.
- ✓ Conducted asbestos investigations at several commercial and residential facilities.
- ✓ Worked with county public works on a Standard of Procedure (SOP) for the removal of subsurface asbestos pipe.
- ✓ Asbestos Presentation at National Association of Clean Air Agencies in Chattanooga, TN.
- ✓ Conducted asbestos presentations at EPA Region IX Asbestos Task Force Meetings.
- ✓ Continued efforts with local building departments and regional environmental agencies, which included joint investigations for non-compliance.
- ✓ Program inspector received 2018 “Rodney Swartzendruber Outstanding Inspector Award” for air quality enforcement inspectors throughout the state recognized for exceptional efforts.
- ✓ District referred asbestos residential facility cases for Tri-County District Attorney prosecution resulting in approximately \$1,550,000 in asbestos related settlements.

### **FY 19-20 Objectives**

- Continue to work with building departments, local environmental agencies, and landfills to promote compliance and improve coordination.
- Continue to offer various avenues for compliance assistance to the public, via website, pamphlets, brochures, and other technology platforms.
- Continue and finalize development of the new Asbestos Program Rule for the objective of greater compliance by improved language, definitions, and enforceability.
- Continue to conduct routine inspections of regulated projects and offer compliance assistance before the start of large scale projects.

### **Mutual Settlement Program**

The Mutual Settlement Program resolves violations of air quality regulations without formal legal proceedings. Notices of Violation are usually settled by mutual agreement between the District and the respondent.

The program is administered by the Enforcement Division Management who settles Notices of Violation through negotiations with respondents. Cases of significant merit may be referred to the local District Attorney's Office for prosecution.

During 2018, the District issued 32 Notices of Violation and negotiated over \$147,000 in penalties, including an asbestos violation at an assisted living facility for \$9,908 and a public nuisance violation at an industrial wastewater treatment facility for \$8,293.

#### **FY 18-19 Major Accomplishments**

- ✓ Finalized Supplement Environmental Project worth \$1,404 with a municipal solid waste disposal facility to accept Monterey county wood waste and vegetation as a diversion from open burning.
- ✓ Modified routing of cases and use of the new database to improve efficiency and tracking during case settlement.
- ✓ Provided compliance assistance and outreach through our website.
- ✓ Worked with violators to promote better work practices and improve compliance.
- ✓ Worked with local building departments to provide District information to permit applicants.

#### **FY 19-20 Objectives**

- Coordinate with local building departments to assure permit applicants are aware of District requirements for both operating permits and asbestos program requirements.
- Utilize new District database to identify trends of noncompliance and promote compliance assistance.
- Reduce the time between discovery of noncompliance and settlements that include corrective actions that promote future compliance.
- Review current Mutual Settlement procedures and propose improvements to program protocol.

### **Portable Equipment Inspections**

In addition to inspecting portable equipment permitted with the District, the Division also inspects portable equipment registered in the State of California's registration program. There are several portable equipment units that need inspection every year.

Examples of the types of portable equipment inspected include engines that power electrical generators, portable concrete batch plants, oil well service equipment, and engines that power sandblasting/painting operations. This equipment can move many times during the course of the year. Inspections are conducted at large storage yards or in the field when the equipment is in operation.

## ENGINEERING DIVISION

---

The Engineering Division staff consists of an Engineering & Compliance Manager (0.5 FTE), a Supervising Engineer, four Permit Engineers, one Senior Administrative Assistant, and an Engineering & Compliance Specialist (0.25 FTE). The Division performs the following functions:

### **Permitting**

The District's permit system is the primary tool to ensure businesses comply with air quality control requirements. Two types of permits issued are Authorities to Construct and Permits to Operate.

Authorities to Construct are preconstruction permits issued after evaluation of project emissions and necessary control technologies and determination of criteria and toxic pollutant regulatory compliance.

Permits to Operate are issued after construction is completed and the equipment is found to be operating in compliance with all terms and conditions of the Authority to Construct and with all applicable regulatory requirements.

The Division oversees 3,080 active Permits to Operate, including the annual renewal process. During calendar year 2018, the Division issued 164 Authorities to Construct, 227 Permits to Operate, 4 Agricultural Diesel Engine Registrations, 8 Title V Permit modifications, and 1 Emission Reduction Credit.

In order to meet state requirements, the Division maintains a registration program for diesel engines used in agricultural operations. Currently, 503 agricultural engines are registered.

The Division also oversees implementation of the Title V Federal Operating Permit program. There are 16 active Title V facility permits within our jurisdiction that are renewed on a five-year cycle.

#### **FY 18-19 Major Accomplishments**

- ✓ Issued 22 authorities to construct for cannabis operations, and continued to work with cannabis operators to clarify and provide notification of permit requirements.
- ✓ Evaluated and issued eight Title V facility permit modifications.
- ✓ Participated on California Air Resources Board (CARB) AB 617, Community Air Protection Program subcommittees to develop a Technology Clearinghouse for Best Available Retrofit Control Technology and a State-Wide Emissions Inventory Tool.
- ✓ Researched emission factors and developed permitting policy for issuance of Authorities to Construct for composting facilities per SB1383, Short Lived Climate Pollutant Strategy.
- ✓ Developed and implemented a permitting methodology to regulate and enforce CARB's Methane Emissions from Municipal Solid Waste Landfills.
- ✓ Processed projects involving on-going installation and/or modification of Enhanced Vapor Recovery and In-Station Diagnostic systems at gasoline stations.
- ✓ Participated in the structural development of the District's new website.

**FY 19-20 Objectives**

- Process projects subject to EPA’s New Source Performance Standards (NSPS) for Crude Oil and Natural Gas Facilities.
- Commence processing of projects to meet the emission inventory reporting requirements of California Air Resources Board (CARB) AB 617, Community Air Protection Program.
- Issue Federal Title V facility permit renewals and modifications.
- Update Tier 1 diesel engine permits to enforce and implement the revisions to CARB’s Airborne Toxic Control Measure (ATCM) for Diesel Particulate Matter from Portable Engines.
- Process projects involving on-going installation and/or modification of Enhanced Vapor Recovery and In-Station Diagnostic systems at gasoline stations.
- Work with the wine industry, EPA, and CARB to develop a cost effective analysis to address the variety of issues regarding fermentation emission best available control technology.
- Participate and stay informed on CARB and CalRecycle’s efforts to find innovative approaches to air quality permitting to achieve the organic diversion mandate of SB1383, Short Lived Climate Pollutant Strategy.

**Rule Development Program**

The process of developing and amending District regulations is achieved through the Rule Development Program. The Engineering and Planning Divisions share this responsibility. Through this program, Divisions detail development of proposed regulations, prepare notification formalities, provide presentations at public workshops and the District Advisory Committee, and participate in public hearings and District Board of Directors meetings.

**FY 18-19 Major Accomplishments**

- ✓ Developed an adopted a resolution implementing an Expedited Best Available Retrofit Control Technology (BARCT) Implementation Schedule required by California Air Resources Board (CARB) AB 617, Community Air Protection Program.

**FY 19-20 Objectives**

- Finalize resolution of California Air Resources Board (CARB) issues regarding Rule 201 (Sources Not Requiring Permits), and Rule 207 (Review of New or Modified Sources).
- Develop a boiler, steam generator, and process heater Best Available Retrofit Control Technology (BARCT) rule.
- Analyze existing regulations for consistency and conformity with applicable requirements, and initiate rule revisions as necessary.
- Adopt rule to reduce landfill gas emissions from municipal solid waste landfills by implementing provisions of EPA’s Title 40 Code of Federal Regulations Part 60, Subpart Cf.

**Air Toxics Programs**

The Engineering Division is responsible for the implementation of the State of California Air Toxics Hot Spots Information and Assessment Act of 1987 (AB 2588). Up until 2017, the program transitioned into a maintenance effort for sources previously inventoried, with Division reviews occurring at a minimum of every four years for sources of intermediate risk and significant changes.

However, in 2015 the Office of Environmental Health Hazard Assessment (OEHHA) updated the methodology used to assess health risks to incorporate childhood exposure to air toxics. Evaluations based upon the updated OEHHA methodology for the same level of emissions and conditions are anticipated to show an increase in potential cancer risk. In addition, the California Air Pollution Control Officers Association (CAPCOA) updated the Facility Prioritization Guidelines in 2016. Based upon these changes, the District revised Rule 1003 in 2017 to reflect the updated OEHHA Health Risk Assessment Guidelines and the updated CAPCOA Facility Prioritization Guidelines.

The District strives to be current on toxic air contaminant actions by the State of California Air Resources Board, the Department of Toxic Substances Control, and OEHHA. In 2018, the District implemented its plan to re-evaluate all sources under the AB 2588 “Hot Spots” program over the next three years.

#### FY 18-19 Major Accomplishments

- ✓ Researched toxic emission factors, prepared and/or approved Toxic Emission Inventory Plans (TEIP) for 26 sources with criteria pollutant emissions equal to or greater than 10 tons per year (TPY) per the Air Toxics “Hots Spots” Information and Assessment Act of 1987 (AB2588)
- ✓ Prepared and/or reviewed Toxic Emission Inventory Reports (TEIR) for 15 sources with criteria pollutant emissions  $\geq$  10 TPY.
- ✓ Completed and calculated prioritization scores for nearly half of all facilities with criteria pollutant emissions  $\geq$  10 TPY.
- ✓ Trained all engineering staff in new OEHHA risk evaluation methodology and updated prioritization methodology, including Hot Spots Analysis and Reporting (HARP) modeling and exposure calculations.
- ✓ Two engineers received training in Air Dispersion Model, AERMOD.
- ✓ Participated in the California Air Pollution Control Officers Association Air Toxics and Risk Managers Committee.

#### FY 19-20 Objectives

- Participate in the development of industry-wide risk assessment guidelines for gasoline dispensing facilities and diesel-fired internal combustion engines, via the California Air Pollution Control Officers Association Air Toxics and Risk Managers Committee.
- Create and distribute annual reporting forms to collect calendar year 2018 process data for the next selected subset of facilities within the less than 10 TPY criteria pollutant emissions category, to be reviewed under the “Hots Spots” program.
- Review Health Risk Assessments for the  $\geq$  10 TPY source category for the implementation of the “Hots Spots” program.
- Develop a plan and implement a program to evaluate toxic emissions as a requirement of California Air Resources Board (CARB) AB 617, Community Air Protection Program.

### **Technical Assistance**

The Division provides technical assistance for a broad range of internal District actions, including review of State of California and Federal program developments, rule development and implementation, hearing board actions, emissions inventory, and California Environmental Quality

Act evaluations.

The Division responds to inquiries from the public regarding permit and regulatory requirements, source information, and general air pollution questions, as well as participating on CAPCOA committees.

**Ongoing Objectives**

- Collaborate with the California Air Resources Board on implementation of actions in AB 617 such as uniform emissions inventory reporting and BARCT implementation.
- Review and evaluate technical assistance priorities.
- Propose and initiate changes that reflect District needs.

## PLANNING DIVISION

---

The Planning Division includes one Planning and Air Monitoring Manager, three Air Quality Planners, and one Air Quality Technician.

The Division performs the following functions:

### **Preparation of State and Federal Plans**

The Division prepares regional air quality plans to show how the region will comply with ambient air quality standards in the future. Plans include technical analysis, growth projections, and attainment strategies based on feasible control measures.

#### FY 2019 - 20 Objectives

- Develop the 2016-2018 Air Quality Management Plan to evaluate progress on meeting the state ambient air quality standards for ozone.
- Prepare documentation to identify exceptional events which caused exceedances of federal PM2.5 and the state ozone standard during wildfires.

### **Air Emissions Inventories**

The Division summarizes estimates of air pollutant emissions from stationary, area and mobile sources in the North Central Coast Air Basin. Inventories are used to identify sources subject to further control, and as input data for computer models to simulate dispersion of pollutants into the atmosphere.

The Division reviews pollutant concentrations and weather conditions to predict future pollutant levels at local and regional scales. Planning staff update the air quality forecast on the District's website several times each week.

#### FY 2019 - 20 Objectives

- Prepare emissions inventory for development of 2016-2018 Air Quality Management Plan.
- Maintain mobile source emissions inventory based on AMBAG's regional transportation demand model and California Air Resources Board's (CARB) EMFAC2017 model.
- Develop an inventory of PM2.5 emissions from residential heating with wood.

### **Land-Use Planning**

The Division provides guidance and assistance to lead agencies, consultants and others concerning air quality and greenhouse gas analyses prepared in accordance with the California Environmental Quality Act (CEQA).

The Division reviews and provides comments on land-use project environmental documents and periodically updates the District's *CEQA Air Quality Guidelines* to reflect current requirements of CEQA statute and CEQA Guidelines.

FY 2018 - 19 Major Accomplishments

- ✓ Reviewed and commented on more than 17 environmental documents.

FY 2019 - 20 Objectives

- Continue reviews and comments on environmental documents.
- Develop guidance for addressing greenhouse gas emissions in environmental documents.
- Coordinate with CARB to meet requirements of the Community Air Protection Program (CAPP).

**Implementation of Grant Programs**

The Division manages grant programs funded by the State of California such as the Carl Moyer Memorial (Moyer) Program, DMV fees (AB 2766 and AB 923), the Funding Agricultural Replacement Measures for Emission Reductions (FARMER) Program and the CAPP.

The Division also manages the East Garrison (EG) mitigation fee grant program. Under this program, fees collected for the construction of each new home in the EG project is used to incentivize the replacement of older agricultural pump engines with cleaner engines or electric motors, and to replace old school buses with all-electric models.

FY 2018 - 19 Major Accomplishments

- ✓ Developed programs to implement grant funding for FARMER and CAPP.
- ✓ Managed more than 60 active grant projects under the AB2766, AB923, FARMER, EG and Moyer Programs.
- ✓ Received and reviewed eligible emission reduction grant applications and electric vehicle replacement applications for AB2766 FY19 funds.
- ✓ Continued the electric vehicle (EV) voucher program for public agencies and an EV incentive program open to the public through the AB2766 grant program.
- ✓ Awarded approximately \$1.6 million in AB 2766 funds to six emission reduction projects and seven public agency electric vehicle vouchers, and \$400K for 300 EV incentives to general public.
- ✓ Awarded \$1.05 million for five diesel engine equipment replacement projects through the Carl Moyer program. These projects are evaluated based on emission reductions and availability of grant funds.
- ✓ Awarded AB923 grant funds for five CNG fuel tank replacements.
- ✓ Wood Stove Change-Out Program expanded to all three counties with \$425,000 from California Climate Investments; 250 old wood burning devices were replaced throughout the District.
- ✓ Continued working with Caltrans and Envision Solar to install electric vehicle DC fast charge stations at the rest areas on Highway 101 near Camp Roberts.
- ✓ Managed the \$300K CEC Grant, EV Fleet Accelerator Project.
- ✓ Developed the Zero Emissions School Bus Program (ZESBP) which administers applications for electric school buses and awards grants depending on the most applicable grant fund: AB923, EG, Moyer, or CAPP.

FY 2019 - 20 Objectives

- Manage AB2766, AB923, Moyer, FARMER, EG, ZESBP and CAP Programs.
- Manage the Plug-In Monterey Bay EV Infrastructure Program.
- Apply for funding for the Wood Stove Change-Out program through California Climate Investments; \$175,000 is expected to be allocated for the program.
- Rank and select projects to award AB2766 funds.
- Obligate Moyer Program funds to selected projects.
- Administer applications for electric school buses per the ZESBP.
- Manage the EG mitigation fee projects and award funds to additional projects.
- Continue to offer an Electric Vehicle Incentive Program through AB2766. Work with Monterey Bay Community Power to offer a single program to the region.

**Transportation Planning**

The Division participates with the Association of Monterey Bay Area Governments (AMBAG) and regional transportation planning agencies in regional transportation planning efforts. Staff participates in committees as well as being a member of the Monterey Bay Electric Vehicle Alliance.

FY 2018 - 19 Major Accomplishments

- ✓ Participated in regular transportation agency meetings.
- ✓ Participated in regular MBEVA meetings.

FY 2019 - 20 Objectives

- Continue to participate in local and regional transportation planning agency committees.
- Continue to support AMBAG's efforts in regional transportation planning.

**Participation in California Air Pollution Control Officers Association's Committees**

The Division participates in two of the California Air Pollution Control Officers Association's (CAPCOA) committees: Planning Managers, and Grants and Incentives.

FY 2018 - 19 Major Accomplishments

- ✓ Planning and Air Monitoring Manager was Chair of the Planning Managers Committee.

FY 2019 - 20 Objectives

- Continue to participate in the Planning Managers, and Grants and Incentives committees.

**Rule Development**

The Division conducts rule development for rules that address programs the Division manages.

FY 2019 - 20 Objectives

- Develop a rule to require the change-out of non-EPA certified wood stoves when residential properties are sold.
- Develop revisions to Rule 438, Open Burning

### **Education and Outreach Program**

The Division manages the District's outreach program including participation in regional events, public education, press releases, advertisements, Air Quality Awareness week in April, and Clean Air Month in May.

#### **FY 2018 - 19 Major Accomplishments**

- ✓ Participated in community events such as student fairs, community festivals, and local college events.
- ✓ Improved the District's presence in social media through posting of information to the District's Facebook page.
- ✓ Expanded public outreach to support FARMER, CAPP, Moyer Program, and AB2766.
- ✓ Participated in the San Lorenzo Valley (SLV) Student Art Contest by judging student art and providing awards.
- ✓ Worked with District staff and website hosting company to redesign the District's website.

#### **FY 2019 - 20 Objectives**

- Continue participation in community events.
- Continue to expand public outreach to publicize grant programs.
- Modify and expand education programs for local schools to teach about air quality, air monitoring and sensor technology.
- Establish an air sensor network at schools, hospitals, daycare/eldercare facilities and other locations.
- Implement the new version of the District's website.

### **Smoke Management Program**

The Division is continuously improving the District's Smoke Management Program (SMP) in order to make the program more protective of public health and more user friendly to the public.

The Division coordinates the District's agricultural and prescribed burning SMP which includes analysis and technical assistance for burn projects. Also, the Division is responsible for the backyard burning smoke management program.

Agricultural and backyard burn permits are issued through the District's online permit systems. Broadcast burn projects are tracked and reviewed through the Prescribed Fire Information Reporting System (PFIRS).

The Division provides technical assistance and comments to other agencies whose land-use projects have the potential to cause smoke impacts.

The Division also administers a contract with the State Department of Toxic Substances Control for District work on the former Fort Ord Burn Program.

FY 2018 - 19 Major Accomplishments

- ✓ Assisted with planning, implementation, and monitoring of prescribed burns.
- ✓ Worked with land managers to evaluate burn areas prior to planned burns.
- ✓ Assisted with planning a prescribed burn at the former Fort Ord.

FY 2019 - 20 Objectives

- Assist with planning, implementation, and monitoring of prescribed burns.
- Improve District website to effectively report smoke impacts from prescribed burns and wildfires.

**Special Projects**

**San Lorenzo Valley PM2.5 Reduction Project**

The San Lorenzo Valley (SLV) is a narrow river valley located in Santa Cruz County. In past winter seasons the District has measured PM2.5 concentrations above the federal 24-hour standard. The primary source of PM2.5 emissions is smoke from wood burning for home heating. The Division implements programs to reduce PM2.5 emissions during Fall and Winter, including a Spare the Air program which asks residents in the SLV to voluntarily use an alternative fuel, other than wood, for heating their homes when meteorological conditions are poor for air quality.

FY 2018 - 19 Major Accomplishments

- ✓ Continued the Woodstove Change-Out Program which was expanded to all three counties.
- ✓ Participated in the Redwood Mountain Faire to educate the public on wood burning and smoke impacts.
- ✓ Participated in the SLV Student Art Contest by judging student art and providing awards.

FY 2019 - 20 Objectives

- Continue PM2.5 reduction efforts in SLV.
- Continue a Wood Stove Change-Out Program.
- Seek continuous improvements for implementation of the “Spare the Air” program to reduce localized impacts from wood burning stoves and fireplaces.

**BUDGET**

**IN**

**BRIEF**

## ► **Fiscal Year 2019-20 Budget in Brief** ◀

The following are budgetary highlights:

- ❖ Total budget of \$19.2 million consisting of:

Operational Budget	\$ 6.3 million
Non-Operational Budget (Grant Programs)	\$12.9 million

- ❖ Proposed fee changes:

- 4.5% for most fee categories with the exception of gasoline dispensing facilities (no increase)
- 10% for asbestos permit fees

- ❖ Increase in City and County per capita fees from \$.43 to \$.47, resulting in an additional \$33,600 in revenues.

- ❖ Total of 32 full time employees.

- ❖ Fixed Asset purchases of \$562,000 including \$225,000 for a new permitting and compliance database, \$210,000 for District building and air monitoring station improvements, \$67,000 for vehicle replacements, \$30,000 for a document management system, and \$30,000 for volatile organic compounds (VOC) monitoring equipment.

- ❖ Estimated \$100,000 deposit to the District's Other Post Employment Benefit (OPEB) Trust, funded by the General Fund reserve designated for post-employment benefits.

- ❖ \$9.3 million for grant payments to reduce emissions for the District's ongoing AB2766, AB923, and Carl Moyer programs and grants under the new Community Air Protection (CAPP) and Funding Agricultural Replacement Measures (FARMER) programs.

- ❖ \$2.65 million to continue District's Plug-In Monterey Bay program to install electric vehicle stations throughout Monterey, Santa Cruz, and San Benito counties. In addition, the District will continue its electric vehicle incentive program for District's residents.

- ❖ Continued assistance towards reducing PM2.5 emissions in the San Lorenzo Valley, including \$175,000 for Woodstove Changeout grants.

The District's finances are reported in separate funds. The table above portrays the District's divisions and programs and how the programs are funded. Below is a brief description of each fund:

**General** - Funds collected from permit fees, Title V fees, asbestos fees, EPA grants, City/County per capita fees, CARB subvention, certain State grants, penalties, special contracts and other revenue.

**AB2766** - DMV Fees collected from the \$4.00 per vehicle registration surcharge program.

**AB923** - DMV Fees collected from the \$2.00 per vehicle registration surcharge program.

**Moyer** - The Carl Moyer Grant program established by the California Air Resources Board as an emission-reduction incentive program administered by air districts.

**General Grants** - Funds from construction projects offsite mitigation fees used for replacements/retrofits of agricultural pumps and school buses.

**Community Air Protection Program (CAPP) Grants** - Established by AB617 and funded by AB134, grants are intended to reduce air pollution in disadvantaged or low-income areas.

**Funding Agricultural Replacement Measures for Emission Reductions (FARMER) Grants** - Funded by AB134 and AB109, grants are to be used to reduce agricultural sector emissions.

FY 2019-20**

<b>Description</b>	<b>Estimated Cost</b>
Database Program for permitting, compliance and tracking other District activities (75% of est costs)	\$ 225,000
District's building exterior painting project (started in FY 18-19)	140,000
Vehicle replacements (Compliance and Air Mon)	67,000
District building roof repairs	50,000
Document management scanning software subscription	30,000
Volatile organic compounds (VOC) monitoring equipment	30,000
Air Monitoring station building improvements	<u>20,000</u>
<b>Grand Total</b>	<b><u><u>\$ 562,000</u></u></b>

## ADMINISTRATIVE DIVISION

Under two programs, Support and Operations and Public Education, the Division performs the following functions:

- District Boards
- General Operations, including building and vehicle maintenance
- Finance and Accounting
- Personnel Administration
- Risk Management
- Information System Services
- Public Education

The Administrative Division consists of the Air Pollution Control Officer (APCO), an Administrative Services Manager, an Executive Assistant to the APCO/Clerk of the Boards, an Administrative and Fiscal Specialist, a Senior Fiscal Assistant, and an Office Assistant.

	<b>ACTUALS</b> <b>FY 17-18</b>	<b>REVISED</b> <b>BUDGET</b> <b>FY 18-19</b>	<b>ESTIMATED</b> <b>ACTUALS</b> <b>FY 18-19</b>	<b>PROPOSED</b> <b>BUDGET</b> <b>FY 19-20</b>

## AIR MONITORING DIVISION

The Air Monitoring Division performs the following functions:

- Ambient Air Monitoring from stations in Salinas, Hollister, Santa Cruz, King City, Carmel Valley, and Felton.
- Meteorological Monitoring
- Enforcement Monitoring in response to complaints
- Data acquisition, data display, and data quality control

The Air Monitoring Division consists of a Planning and Air Monitoring Manager (.5 FTE), a Supervising Air Monitoring Specialist, two Senior Air Monitoring Specialists, and an Air Monitoring Technical Assistant (vacant position).

	<b>ACTUALS FY 17-18</b>	<b>REVISED BUDGET FY 18-19</b>	<b>ESTIMATED ACTUALS FY 18-19</b>	<b>PROPOSED BUDGET FY 19-20</b>

Utilities & Office Rent	23,541	27,085	27,285	28,457
Training & Travel	2,753	12,000	9,800	8,000
Fixed Assets	31,627	35,000	28,625	52,000
<b>Totals</b>	<b>\$ 631,985</b>	<b>\$ 672,066</b>	<b>\$ 689,000</b>	<b>\$ 647,926</b>

## COMPLIANCE DIVISION

The Compliance Division performs the following major functions:

- Enforcement of all applicable local, state, and federal laws and regulations in the District
- Burn Program for open and prescribed burns
- Compliance Assistance Program to ease and facilitate compliance by regulated sources
- Asbestos Program to enforce federal NESHAP regulations
- Representation at District's Hearing Board
- Management of Mutual Settlement Program
- Source Testing observations of stack emissions

The Compliance Division consists of an Engineering and Compliance Manager (.5 FTE), a Supervising Inspector, seven field Inspectors, an Engineering and Compliance Specialist (.75 FTE), and a Senior Administrative Assistant.

	<b>ACTUALS FY 17-18</b>	<b>REVISED BUDGET FY 18-19</b>	<b>ESTIMATED ACTUALS FY 18-19</b>	<b>PROPOSED BUDGET FY 19-20</b>
<b><u>Expenditures by Type:</u></b>

## ENGINEERING DIVISION

The Engineering Division performs the following major functions:

- Permitting to ensure that businesses comply with air quality control requirements
- Rule Development including proposed regulations and regulatory changes pertaining to engineering activities
- Toxics Program
- Technical Assistance including review of federal and state programs and emission inventory

The Engineering Division staff consists of an Engineering and Compliance Manager (.5 FTE), a Supervisor, four Permit Engineers, an Engineering and Compliance Specialist (.25 FTE), and a Senior Administrative Assistant.

	<b>ACTUALS</b> <b>FY 17-18</b>	<b>REVISED</b> <b>BUDGET</b> <b>FY 18-19</b>	<b>ESTIMATED</b> <b>ACTUALS</b> <b>FY 18-19</b>	<b>PROPOSED</b> <b>BUDGET</b> <b>FY 19-20</b>

## PLANNING DIVISION

The Planning Division performs the following functions:

- Preparation of Federal and State regional air quality plans
- Development of Emission Inventories from stationary, area, and mobile sources
- Analysis of air quality problems
- CEQA guidance to Lead Agencies, consultants, and others
- Grants and contractual programs
- Educational programs for the general public

The Planning Division consists of a Planning and Air Monitoring Manager (.5 FTE), three Air Quality Planners and an Air Quality Technician.

**Notes:**

- (1) Assumption for 19-20 is that all outstanding grants are paid out during the fiscal period. Over the last five fiscal periods, actual grant expenditures have averaged 43% of budget.
- (2) Per the District's Reserve Policy, the minimum level is 25% of the current year's Operating Budget.

# RESOLUTION

**RESOLUTION 19-013**

**BEFORE THE AIR POLLUTION CONTROL BOARD OF THE  
MONTEREY BAY AIR RESOURCES DISTRICT**

Adopt the Fiscal Year (FY) 19-20 Budget in the Amount of \$19,242,237;  
Authorize the Purchase of Specified Fixed Assets;  
Approve the Per Capita Assessment per the District's Unification Agreement;  
Approve Permit Fees Effective July 1, 2019 Per the Attached Fee Schedule; and  
Approve Direction to Staff for Development of Future District Budgets .....

BE IT RESOLVED, a budget figure in the amount of \$19,242,237 for FY 19-20 is hereby adopted for the Monterey Bay Air Resources District and the Air Pollution Control Officer is hereby directed to implement the Budget accordingly.

BE IT FURTHER RESOLVED, the Air Pollution Control Officer is authorized and hereby directed to negotiate and sign the final supplemental applications for potential Federal grant and State subvention funds for FY 19-20.

BE IT FURTHER RESOLVED, the Air Pollution Control Officer is hereby authorized to purchase the fixed assets included in the budget at costs not to exceed funds in the total fixed asset account.

BE IT FURTHER RESOLVED, by majority vote, this Board determined the new per capita assessment imposed and paid by all cities and counties within the District, as stipulated in the District's Unification Agreement. The per capita assessment for FY 19-20 shall be forty-seven cents (\$.47).

BE IT FURTHER RESOLVED, by majority vote, this Board approves the attached permit fee schedule and directs staff to develop future budgets recognizing a consistent index of inflation. As needed, the Budget will be prepared for the Board's consideration using the San Francisco-Oakland-San Jose Consumer Price Index as available to adjust general regulatory fees.

PASSED AND ADOPTED this 24th day of June 2019, upon motion of Director Phillips, seconded by Director Lopez and carried by the following vote, to wit:

AYES: Directors Carbone, Coonerty, Friend, Hurst, Ledesma, Lenoir, Lopez, Parker, Phillips

NOES: None.

ABSENT: Directors Botelho, McShane, Spencer

I hereby certify that the foregoing is a true and correct Resolution as duly adopted by the Board of Directors of the Monterey Bay Air Resources District on June 24, 2019.

By: Ann O'Rourke  
Ann O'Rourke, Executive Assistant

Approved: Richard A. Stedman  
Richard A. Stedman, APCO

# **GLOSSARY**

**MONTEREY BAY AIR RESOURCES DISTRICT  
FY 2019-20 BUDGET  
GLOSSARY OF TERMS & ACRONYMS**

**AB2766 Fees:** Department of Motor Vehicle (DMV) surcharge fees collected through California's vehicle registration program, pursuant to the 1990 California Assembly Bill (AB) 2766. The fee collected is \$4.00 per vehicle.

**AB923 Fees:** Department of Motor Vehicle (DMV) surcharge fees collected through California's vehicle registration program, pursuant to the 2004 California Assembly Bill (AB) 923. The fee collected is \$2.00 per vehicle.

**AMBAG:** Association of Monterey Bay Area Governments serving as both a federally designated Metropolitan Planning Organization and a Council of Governments for the Monterey, San Benito, and Santa Cruz Counties region.

**APCO:** Air Pollution Control Officer who serves as executive director for the District.

**CAPCOA:** California Air Pollution Control Officers Association, a non-profit association of the air pollution control officers from all 35 local air quality agencies throughout California. The District is a member of this association.

**CAPP:** Community Air Protection Program, State funding to implement Assembly Bill 617. Funding is used to deploy community air monitoring systems and to reduce exposure in communities most impacted by air pollution.

**CARB:** California Air Resources Board, the State agency charged with protecting the public from the harmful effects of air pollution and developing programs and actions to fight climate change.

**CARB Subvention:** Funds provided to the District pursuant to Section 39800 et seq. of the California Health and Safety Code. Subvention funds are provided to districts of up to \$1 for every dollar budgeted, as long as the subvention does not exceed \$.23 per capita.

**CITY AND COUNTY CONTRIBUTIONS:** Each city and county in the District's Tri-County jurisdiction contributes \$.47 per capita to the District based on a Unification Agreement. The contributions are paid in lieu of each city and county creating and maintaining its own air quality program.

**DMV:** Department of Motor Vehicles.

**EPA:** Environmental Protection Agency, a federal agency whose mission is to protect human health and safeguard the environment. The District receives funding from the EPA.

**EVR:** Enhanced Vapor Recovery refers to a new generation of clean nozzles and equipment that control emissions at gasoline dispensing facilities in California.

**FARMER**: Funding Agricultural Replacement Measures for Emission Reductions, State funding to reduce agricultural sector emissions by providing grants, rebates, and other financial incentives for agricultural harvesting equipment, heavy-duty trucks, agricultural pump engines, tractors, and other equipment used in agricultural operations.

**FTE**: Full-time equivalent position scheduled to work 40 hours per week.

**FUND**: Can be thought of as a separate set of books for a specific purpose.

**FUND BALANCE**: The excess of assets over liabilities; a negative fund balance is sometimes called a deficit.

**GENERAL FUND**: Consists of all District revenue and matching expenditures except that which is restricted to specific use by statute or Board action.

**NESHAP**: National Emission Standards for Hazardous Air Pollutants which are stationary source standards for pollutants that are known or suspected to cause cancer or other serious health effects.

**NON-OPERATING BUDGET**: Consists of revenue collected from the State and passed on to other entities in the form of grants for emission reducing projects.

**OEHHA**: Office of Environmental Health Hazard Assessment which is a California State department responsible for developing and providing risk managers in state and local government agencies with toxicological and medical information relevant to decisions involving public health.

**OPEB**: Other Post Employment Benefits which are retiree benefits other than pensions. The District's pays for a portion of health care premiums for retirees who participate in the District's medical plans.

**OPERATING BUDGET**: Primarily uses the General Fund to pay for all expenditures incurred in the day-to-day operations of the District.

**PERP**: Owners or operators of portable engines and other types of equipment can register their units under the CARB Statewide Portable Equipment Registration Program (PERP) in order to operate their equipment throughout California without having to obtain individual permits from local air districts. The State collects the fees and remits them to the District.

**PM**: Particulate matter, a criteria pollutant.

**PROGRAM**: Categories of services or activities the District engages in.

**TAMC**: Transportation Agency for Monterey County which funds and implements transportation projects in Monterey County.

**TCM**: Traffic control measures.

**TITLE V Program**: Title V of the Federal Clean Air Act requires the collection annual federal permit fees for stationary sources based on annual emissions. This program generally applies to the District's major sources.
